

Replit (YC18), a browser-based integrated development environment (IDE) aiming to bring the next billion developers online, selects 10 Academy to join its 2nd Venture program

Santa Clara, CA, June 27th, 2022

10 Academy has secured a \$10k grant and support from Replit to continue its growth. As part of the 2022 cohort of the Replit Ventures program, 10 Academy will work closely with the team at Replit and other external mentors to continue to build technology, training and systems towards the goal of scaling systems by 10x in 2022.

Replit's mission aims to bring the next billion software creators online. Previously, software creation has been limited to professional software engineers, primarily in tech hubs. Both Replit and 10 Academy share the goal of enabling high potential young people, from anywhere, and on any device, to have a positive impact through technology.

Being selected to participate in Replit's highly competitive 2nd Venture program (10 Academy was one of only two not-for-profits selected) is further proof and validation of the quality of 10 Academy's training approach as well as the quality of the training itself. This partnership confirms the value of 10 Academy's mission to build Africa's workforce in key areas of the 4th Industrial Revolution and will enable 10 Academy to continue to have empowering real-life impacts on graduates.
